Sir:

Response to Restriction Requirement

This paper is responsive to the Restriction Requirement in the Office Action dated May 1, 2006, from the U.S. Patent and Trademark Office in the above-identified patent application.

Restriction Requirement

Restriction was required under 35 U.S.C. §121 as follows:

Group I – Claims 1-15, drawn to an apparatus, classified in class 422, subclass 82.05.

Group II – Claims 16-33, drawn to a method of conducting chemical reactions, classified in class 435, subclass 6.

Group III – Claims 34-36, drawn to methods of data transmission, classified in class 455, subclass 39.

In making the Restriction Requirement, a determination was made in the Office Action that the inventions of Groups I, II and III are distinct each from the other. According to M.P.E.P. 802.01 the term “distinct” means that two or more subjects as disclosed are related, for example, as combination and part (subcombination) thereof, process and apparatus for its practice, process and product made, etc., but are capable of separate manufacture, use, or sale as claimed, AND ARE PATENTABLE (novel and unobvious) OVER EACH OTHER (emphasis in original). Accordingly, in making the restriction requirement the Office Action is acknowledging at least implicitly that the inventions of the aforementioned groups are separately patentable over one other. If this were not the case, then the restriction requirement would not be proper.

Furthermore, it follows from the above that art (if such art exists) indicating that the invention of one of the groups is known or would have been obvious would not extend to a holding that the inventions of the other groups are known or would have been obvious. For example, art that might anticipate or render obvious a method for conducting chemical reactions using an apparatus of claim 1, as set forth in claim 16 (and claims depending therefrom), would not render known or obvious an apparatus according to claim 1 (and claims depending therefrom) or vice versa. Again, if this were not the case, then the restriction requirement with respect to those claims would not be proper. A similar analysis is applicable to the other groups.

In response to and as required by the Restriction Requirement, Applicant elects the invention of Group I, claims 1-15, with traverse. Applicant reserves the right to file divisional patent applications to the subject matter that the Office Action has determined to be patentably distinct and separately patentable.

Product and Process Claims

The Office Action noted that restriction was required between product and process claims. Applicant acknowledges the indication in the Office Action that, where product claims are elected (such as elected above) and a product claim is

subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of M.P.E.P. §821.04. Method claims 16-36 already are dependent from apparatus claims and, thus, fulfill the above requirement with respect to withdrawn process claims (although such claims are not officially withdrawn).
